The following is an examiner's statement of reasons for allowance: Although USP 5126103 at col 6 line 10 teaches that a porous (open cell) particulate glass material can be used for desalinating water, it is unclear from the reference whether it satisfies all property ranges set forth in claim 1. There is no suggestion in the patent that the media described in DE 100 22 798 be used to desalinate water. There is no suggestion in DE 100 22 798 that the media described in 5126103 be modified to the property ranges recited in claim 1.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
